

DJ Lead-Calcium Battery

**FOR TELECOMMUNICATIONS APPLICATIONS
CAPACITIES FROM 110 TO 200 AMPERE-HOURS**

Every cell
100%
capacity tested

DJ SERIES BATTERY

C&D Technologies' flooded batteries are engineered to provide superior performance and reliability over the life of the product. These batteries are designed using proprietary techniques and quality components and materials for reduced maintenance and extended battery life.

FEATURES & BENEFITS

RELIABILITY

- Time tested epoxy post seal and reliable tongue and groove jar-to-cover seal designs provide increased adhesive coverage area — offering unprecedented seal integrity during service
- Top suspended positive plate design allows free downward growth without pressure on jar, cover, or post seal — extending reliability and product life
- Recessed vent area to collect water and acid spills, keeping them away from posts and cover — lowering maintenance and clean-up costs
- Wrapped separator design extends cycle life — improving product reliability
- Enhanced post seal design

SAFE OPERATION

- Self extinguishing features (LOI >32) of flame retardant (FR) cover and jar material — providing added protection
- Low evaporation, flame arrestor vents protect against external source from igniting hydrogen gas within the cells — improving safety

COST SAVINGS

- Unique jar design facilitates installation
- Compact, optimized product size nets up to 40% floor space reduction — saving valuable space
- Angled posts use standard lead-plated copper connectors and improved post to connector contact — lowering resistance and allowing for quicker installation

The new 20-year design life DJ batteries incorporate these benefits in a transparent container for visual inspection of plates and individual cell voltage taps on the connector covers for cell voltage readings.

SPECIFICATIONS

Recommended float voltage range	2.21–2.22 volts per cell (1.215 specific gravity)
Specific gravity of electrolyte @77°F (25°C)	1.215 (standard)
Cover material – Standard	High impact, PVC, LOI>32, UL94-V0
Container material – Standard	Transparent, high-impact PVC, LOI>32, UL94-V0
Separator material – Standard	U-wrapped, microporous with fibrous mat
Terminal type	Hardened lead post
Safety vent	Flame arrestor / low evaporation type

C&D capacity tests every DJ battery to 100% of published rating which ensures 100% capacity out-of-the-box (no need to field cycle the batteries to reach rated capacity). This saves time and money for users.

SPECIFICATIONS

Nominal rates 1.215 specific gravity @ 77°F (25°C) (includes connector voltage drop) *
